

MOAZZAM PASHA

Frontend Developer | React.js | Next.js | UI Engineer

Bahawalnagar, Pakistan • +92 308 1022824 • moazzampasha356@gmail.com • linkedin.com/in/moazzam-pasha-9619783a9 • moazzam35.github.io/portfolio

PROFESSIONAL SUMMARY

Frontend developer with experience building and deploying web applications using React.js, Next.js, and modern JavaScript. Comfortable with component-based architecture, REST API integration, and responsive UI design using Tailwind CSS. Have worked with Framer Motion and GSAP to build interactive, animated interfaces. Looking for remote frontend developer or UI engineer roles where I can contribute, learn, and grow as part of a product-focused team.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3

Styling & Layout: Tailwind CSS, Bootstrap, Responsive Design, Flexbox, CSS Grid, Mobile-First

Animation: Framer Motion, GSAP, CSS Transitions, Scroll Animations, Micro-interactions

React: Hooks (useState, useEffect, useContext, useRef), Context API, Custom Hooks, Component Architecture

API & Data: REST API Integration, Axios, Fetch API, Async/Await, Client-Side Caching, Request Batching

Tools & Deployment: Git, GitHub, Vercel, Netlify, GitHub Pages, Postman, VS Code, Vite, npm

EXPERIENCE

Frontend Developer (Freelance / Self-Directed) • [Remote](#) • Bahawalnagar, Pakistan • June 2024 – Present

- Built and deployed 6+ web applications using React.js and Next.js, integrating REST APIs with Axios and Fetch API for dynamic data rendering.
- Added UI animations and interactive elements using Framer Motion and GSAP — scroll-triggered effects, transitions, and drag interactions.
- Built reusable React component libraries with custom Hooks, reducing repeated code and keeping projects consistent across builds.
- Improved page performance by applying lazy loading, debouncing user inputs, and caching API responses on the client side.
- Built responsive, mobile-first layouts with Tailwind CSS and Bootstrap, tested across screen sizes and browsers.
- Deployed all projects to Vercel and Netlify via GitHub with continuous deployment; used Postman for API testing and validation.

PROJECTS

Wheelzy — Automotive Marketplace wheelzy-seven.vercel.app

Stack: Next.js, React.js, JavaScript, Framer Motion, GSAP, Tailwind CSS, Vercel

- Built a car marketplace web app with Next.js using server-side rendering for faster initial loads and better SEO.
- Added scroll-driven animations and interactive UI elements with Framer Motion and GSAP, including parallax effects and drag interactions.
- Designed a fully responsive layout with Tailwind CSS, focused on clean visual presentation and smooth transitions.
- Structured the project using reusable components for consistent UI and easier feature updates.
- Deployed to Vercel with continuous deployment from GitHub; monitored performance using Lighthouse.

ShopCraft — E-Commerce SPA moazzam35.github.io/ShopCraft | github.com/moazzam35/ShopCraft

Stack: React.js, JavaScript, Tailwind CSS, REST API, Context API, Vercel

- Built a single-page e-commerce app with a product catalog, shopping cart, and multi-step checkout flow using React.js.
- Integrated a REST API serving 50+ products with client-side filtering, sorting, and real-time search functionality.
- Managed global state using Context API; handled async data fetching with useEffect and Axios.
- Built with Tailwind CSS for a responsive layout; deployed to Vercel with CI/CD via GitHub.

Country Cards Explorer moazzam35.github.io/country-cards | github.com/moazzam35/country-cards

Stack: React.js, JavaScript, REST API, Tailwind CSS, Netlify

- Built a data explorer that fetches and displays information for 195+ countries from a public REST API — flags, population, currencies, and region data.
- Added search, multi-criteria filtering, and sorting with debounced input handling to reduce unnecessary API calls.
- Implemented lazy loading for faster load times; deployed to Netlify with a fully responsive layout.

Pokémon Data Explorer moazzam35.github.io/pokemon-data | github.com/moazzam35/pokemon-data

Stack: JavaScript (ES6+), HTML5, CSS3, REST API, GitHub Pages

- Built a data explorer for 800+ Pokémon using vanilla JavaScript and a public REST API, with search, type filtering, and stat/evolution detail views.
- Addressed API rate-limiting by batching requests and caching responses on the client to avoid repeated fetches.
- Built the UI entirely with JavaScript DOM manipulation; deployed to GitHub Pages with responsive design.

EDUCATION

Bachelor of Science in Information Technology (BS IT)

The Islamia University of Bahawalpur — Bahawalnagar Campus, Punjab, Pakistan

Expected: 2025 | CGPA: 3.4 / 4.0 | Relevant Coursework: Web Development, Database Systems, Programming Fundamentals

ADDITIONAL INFORMATION

Languages: Urdu (Native) • English (Professional)

Availability: Open to remote, hybrid, and on-site roles globally

Portfolio: moazzam35.github.io/portfolio • github.com/moazzam35
